EDUCATION

B.Tech in Computer Science and Engineering | Bennett University

2024 – 2028

CGPA: 7.89/10

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, TypeScript

Frontend: HTML, CSS, React.js

Backend & APIs: Node.js, Express.js, FastAPI, Pydantic, REST APIs, JWT, WebSockets

Databases & Messaging: MongoDB, PostgreSQL, Redis, RabbitMQ

AI/ML: Scikit-learn, Pandas, NumPy, ML Pipelines, LangChain, LangGraph

DevOps & Tools: Docker, AWS, Git, GitHub, VS Code, Postman, Jira

PROJECTS

Student Mental Health Score Prediction

Tech: Python, Scikit-learn, Pandas, FastAPI, Pydantic, Joblib

- Developed a machine learning regression model to predict student mental health scores from behavioral and lifestyle factors.
- Implemented data preprocessing and feature transformation using Scikit-learn Pipeline and ColumnTransformer.
- Compared Linear Regression and Random Forest, with hyperparameter tuning to improve model performance.
- Deployed the trained model as a FastAPI REST API with Pydantic-based input validation.

AI Interview Platform

Tech: React.js, Node.js, Express.js, MongoDB, Microservices, LangChain, LangGraph, Redis, Docker, AWS, Firebase

- Developed a full-stack AI-powered interview platform using React.js, Node.js, Express.js, and MongoDB with a scalable microservices architecture.
- Built specialized AI agents for resume analysis, interview conduction, candidate feedback, and personalized learning-roadmap generation using LangChain and LangGraph.
- Implemented an API Gateway to route requests across independent backend services and integrated Redis for caching and low-latency data access.
- Containerized microservices using Docker and deployed the application on AWS, with Firebase Authentication for secure user authentication.

ACHIEVEMENTS

- Solved 250+ DSA problems across GeeksforGeeks and LeetCode
